

The Nation's Largest Oral Surgery Practice Reaches New Heights

Empowering growth through efficiency | Unlocking new potential

For more than 45 years, Atlanta Oral & Facial Surgery has stood at the forefront of clinical excellence. To continue its growth trajectory and adapt to the ever-changing healthcare landscape, it strategically partnered with Beacon Oral Specialists four years ago. This decision was not merely about expansion—it was about enhancing capabilities, preserving clinical independence, and securing a sustainable future in an increasingly competitive environment.

Growth Demands Efficiency

As the largest oral surgery practice in the country, the team at Atlanta Oral & Facial Surgery needed advanced systems and resources to stay nimble and lighten its administrative load. After evaluating multiple partnership options, the practice chose Beacon Oral Specialists because of its proven commitment to long-term growth, leadership in the field, and partner-focused approach that aligned with the practice's vision. The partnership was forged on shared values, with the practice maintaining full control over clinical decisions while leveraging Beacon's robust support infrastructure.

"We were looking for a partner, one that would enhance our business. We still function as AOFS but with the ability to rapidly accelerate our model and business plan. Partnering with Beacon is an opportunity to improve what you are doing without being told how you have to do things."

Dr. Paul Schaner,
CEO, Atlanta Oral
& Facial Surgery

Lighting the Way with Transformational Solutions

Since partnering with Beacon, Atlanta Oral & Facial Surgery has streamlined its operations, allowing surgeons to concentrate on what matters most—delivering exceptional patient care.

Administrative Relief

By managing the administrative responsibilities necessary to run a successful practice—from procurement to payroll—Beacon has enabled Atlanta Oral & Facial Surgery to optimize its clinical operations. The surgeons and staff can now prioritize their core mission: elevating the patient experience and improving patient outcomes. Since joining Beacon, the practice has also added three new locations—expanding the community's access to quality care.

Access to Shared Resources

The partnership has opened doors to critical resources that were previously out of reach. Beacon's advanced tools, including real-time analytics, have driven significant improvements in practice efficiency. These resources have facilitated larger projects, accelerated the onboarding process for new surgeons, and provided the capital needed to pursue strategic growth opportunities.

Enhanced Surgeon Experience

Beacon's support extends beyond operations; it enriches the professional lives of surgeons. With access to conferences, seminars, and ongoing training, younger surgeons can refine their techniques and adopt new strategies. Senior surgeons can take advantage of clear pathways for career advancement and retirement planning. At every stage of their professional journey, surgeons are supported with work/life balance.

A Partnership for Long-Term Success

Atlanta Oral & Facial Surgery has experienced significant growth in both revenue and operational efficiency since partnering with Beacon—positioning the practice for continued success. As the practice continues to expand, its relationship with Beacon will remain a cornerstone of its strategy, enabling it to stay ahead in a competitive field and maintain its status as a leader in oral surgery.
